Remote monitoring on your mobile phone!

REAL TIME H264

Using your mobile, connect straight to the alien DVR and see realtime images straight from your business or home - what a great feature!

Live images can be viewed remotely over the Internet via a web browser or by its own client software, as well as the built in mobile phone software.

Mobile Phone Remote Monitoring You can connect to the alienDVR using a mobile phone*, see live images and even controls PTZ.

Easy Set Up & Control The alienDVR is supplied with a free mouse and a Remote Control handset for fast installation and operation.

Real Time Video on all channels AlienDVR records real-time video from each of its camera channels so you don't need to miss a thing.

Remote Internet Monitoring This superb DVR is supplied with a free copy of the multi-site central monitoring station software.

Network Using the Client software supplied, this DVR can be networked so that any users in the business can monitor the CCTV images.

PTZ Support Despite its small price tag, the alienDVR is big on features. It can offer local and remote operation of most PTZ cameras on the market.

NEW Talk-Back A built in 2-way audio channel allows a user to talk back to areas under surveillance using an external speaker or tannoy system.

Easy Local & Remote Back Up Video evidence can easily be backed up locally by the user to a USB flash stick.
